EDUCATION

Indiana University - Indianapolis

B.S. in Informatics | Human-Computer Interaction Certificate (In Progress).

Expected Dec 2026

SKILLS

Data & Analytics: SQL, Python, R, Power BI, Tableau, Data Visualization, Statistical Modeling

Databases: MySQL, Relational Database Design, Normalization, ER Diagrams

Development: PHP, REST APIs, JavaScript, HTML/CSS, React, Next.js

Tools: Git, Microsoft 365, Postman, VS Code, Figma

EXPERIENCE

Teaching Assistant

Fall 2026 – Present

Indiana University Indianapolis

- Support students with SQL, relational database design, normalization, ER diagrams, triggers, and views
- Assist with MySQL and phpMyAdmin while troubleshooting queries, schemas, and database implementation issues
- Guide students through database projects involving schema design, normalization, ERD development, and implementation

Manufacturing Factory Employee

Summer 2023 – Summer 2026

Draper, Inc.

- Assembled, tested, and packaged manufactured products within a collaborative production environment
- Followed quality control procedures to ensure consistency and reliability

PROJECTS

European Soccer Analytics Research

RStudio, Data Preprocessing, K-Means Clustering, PCA, Data Visualization

- Contributed to preprocessing a 25,000+ match European soccer dataset by removing unusable fields, handling missing values, recoding variables, and standardizing data for analysis
- Helped develop research hypotheses examining match prediction, short-term momentum, and tactical differences across European leagues
- Conducted K-means clustering on league-level tactical attributes and used PCA to visualize differences in playing styles across 11 European leagues
- Identified four broad tactical groupings and league-level differences in build-up play, chance creation, and defensive intensity

Hotel Booking System API

PHP, Slim Framework, MySQL, REST APIs

- Designed a normalized relational database supporting hotels, rooms, guests, bookings, and amenities
- Developed RESTful API endpoints for hotel reservation and booking management
- Implemented CRUD operations using PHP, MySQL, and Eloquent ORM
- Collaborated within a team using Git-based workflows and API design practices

Mental Wellness HCI Research

HCI, UX Research, Accessibility, Prototyping

- Conducted user-centered research focused on stress management and emotional reflection tools
- Developed personas, workflows, and design recommendations based on user needs
- Focused on reducing friction and improving accessibility in wellness-oriented experiences
- Applied human-centered design methods to improve user experience outcomes

ACTIVITIES & LEADERSHIP

Gleaners Food Bank
